

## Subject Index for Volume 58

Word(s), Vol (No) : Initial Page

- acupuncture analgesia 58(3): 165  
acute kidney injury 58(2): 124  
adenoviral catalase 58(6): 420  
ageing 58(1): 9  
aging 58(5): 322  
Akt phosphorylation 58(5): 294  
allodynia 58(1): 72  
Alzheimer disease 58(2): 104  
Alzheimer's disease 58(6): 359  
amphetamine 58(4): 219  
angiotensin II 58(4): 219, 58(6): 367  
anhedonia 58(6): 404  
antidepressant 58(6): 404  
anti-hepatoma 58(3): 156  
anti-inflammation 58(3): 147  
antioxidant 58(3): 147  
apoptosis 58(1): 1, 58(3): 156, 58(3): 197, 58(4): 244,  
58(5): 285, 58(5): 302, 58(6): 420  
auditory brainstem response 58(6): 359  
Autophagic cell death 58(2): 95  
autophagy 58(6): 420
- baicalein 58(1): 38  
Bcl-2 family 58(4): 244  
beta-cyclodextrin modified SHSST 58(1): 38  
Bioceramic 58(3): 147  
biochemical analysis 58(4): 211  
blood cells 58(4): 211  
bone loss 58(5): 322  
breast cancer 58(5): 275, 58(6): 377, 58(6): 385
- Ca<sup>2+</sup> 58(1): 1, 58(2): 85, 58(3): 178, 58(5): 285, 58(5): 302,  
58(6): 377  
calmodulin 58(3): 147  
cAMP response element binding protein (CREB) 58(1): 19  
cancer antigen 15-3 58(6): 385  
cannabinoid receptor 58(1): 72  
carcinoembryonic antigen 58(6): 385  
cardiac survival signaling 58(3): 188  
cardioprotection 58(4): 254  
caspase 58(3): 156  
caspases 58(3): 188  
chemical hypoxia 58(5): 343  
Chinese herbs 58(6): 367  
chromatin immunoprecipitation assay (ChIP) 58(5): 275  
chronic mild stress 58(6): 404  
circadian 58(1): 19  
cirrhotic cardiomyopathy 58(1): 38  
c-myc 58(2): 134  
cochlear pathology 58(6): 359
- CoCl<sub>2</sub> 58(4): 244  
corneal 58(2): 85  
cortisol 58(4): 263  
cyclin D1 58(2): 134
- D5 Stat5a 58(5): 275  
death-receptor-dependent pathway 58(3): 188  
deep-sea-water (DSW) 58(3): 197  
depression 58(6): 404  
diabetes mellitus (DM) 58(3): 197  
diagnosis 58(6): 385  
differentiation 58(5): 343  
dilong 58(3): 188  
diosgenin 58(5): 322  
distortion product otoacoustic emissions 58(6): 359  
dopamine 58(1): 46, 58(4): 219  
doxepin 58(3): 178  
DsRed-monomer 58(1): 27  
dynamic muscle contraction 58(1): 9
- endoplasmic reticulum 58(3): 178, 58(5): 285, 58(5): 302,  
58(6): 377  
ensemble single-unit activity 58(5): 332  
ERK1/2 58(4): 244  
escitalopram 58(6): 404  
ESR2 58(2): 134  
exercise 58(4): 254
- FADD 58(3): 156  
far infrared ray 58(3): 147  
fibrotic 58(6): 393  
fluorescent-BCECF 58(4): 228  
follicular phase 58(2): 114  
formalin test 58(1): 72  
frequency 58(4): 211  
fura-2 58(6): 377  
Futokadsura stem 58(2): 104
- GABAergic transmission 58(1): 46  
gender differences 58(4): 263  
genotype 58(1): 64  
Glioblastoma 58(2): 95  
GLUT4 58(5): 294  
guanethidine 58(5): 312
- H3K27Me3 58(5): 275  
hearing loss 58(6): 359  
heart rate variability 58(2): 114  
heat shock protein 58(3): 147  
hemodynamic perturbations 58(5): 312

- Hep3B cell 58(3): 156  
Hep3B cells 58(2): 134  
hepatocyte growth factor 58(6): 393  
hepatoma 58(1): 1  
hexamethonium 58(5): 312  
hippocampus 58(1): 19  
histone modification 58(5): 275  
H-reflex 58(1): 9  
human gastric cancer cells 58(5): 302  
human monocytes 58(4): 228  
human oral cancer cells 58(5): 285  
human prostate cancer cells 58(3): 178  
human umbilical cord mesenchymal stem cells 58(5): 343  
Huntington's disease 58(6): 359  
hydrocortisone 58(5): 294  
hypoxic preconditioning 58(5): 343
- ICR 58(1): 27  
IGF-I 58(6): 412  
IGF-I signaling 58(6): 412  
IGFBP-7 58(5): 275  
imaging examination 58(6): 385  
indomethacin 58(4): 228  
inflammation 58(2): 104, 58(4): 254  
inflammatory pain 58(1): 72  
iNOS 58(1): 19  
insulin 58(5): 294  
intermittent hypoxia 58(4): 219, 58(4): 254  
intracellular pH 58(4): 228  
ischemia/reperfusion 58(6): 420
- kidney 58(6): 420  
kidney injury 58(6): 367
- laser evoked potential 58(5): 332  
left ventricular 58(4): 254  
light dark cycle 58(1): 19  
liver 58(3): 197  
liver fibrosis 58(1): 55  
liver regeneration 58(6): 393  
Lu-Do-Huang 58(3): 156  
lumbrokinase 58(3): 188  
luteal phase 58(2): 114
- magnesium (Mg) 58(3): 197  
medial entorhinal cortex 58(1): 46  
meridian 58(3): 165  
methoxychlor 58(1): 1  
MgSO<sub>4</sub> 58(4): 244  
miconazole 58(6): 377  
microcomputed tomography 58(5): 322  
microdialysis 58(4): 219  
microelectrode array 58(5): 332  
microspectrofluorimetry 58(4): 228  
mIPSCs 58(1): 46  
mitochondria 58(4): 244  
mitochondria-dependent pathway 58(3): 188  
muscle fatigue 58(3): 147
- Na<sup>+</sup>/H<sup>+</sup> exchanger (NHE) 58(4): 228  
nasopharyngeal carcinoma 58(1): 64  
nerve block 58(4): 237  
nerve stimulation 58(4): 237  
neurolysis 58(4): 237  
nipple discharge 58(6): 385  
nitric oxide 58(3): 147, 58(6): 420  
nitrite 58(2): 124  
nociception 58(5): 332  
NPC-14686 58(5): 285
- Ocimum gratissimum* polyphenol extract 58(1): 55  
oscillating platform 58(4): 211  
osteoporosis 58(5): 322  
oxidative stress 58(2): 104, 58(2): 124  
OXYs rats 58(5): 322
- P. mungo* 58(3): 156  
pain 58(5): 332  
Parthenolide 58(2): 95  
partial hepatectomy 58(6): 393  
passive movement 58(1): 9  
peripheral nerve regeneration 58(6): 412  
phenol 58(4): 237  
phospholipase C 58(3): 178, 58(5): 285, 58(5): 302  
physical and psychological stress 58(4): 263  
pilomotor line 58(3): 165  
plantarflexion 58(1): 9  
polymorphism 58(1): 64  
prestin, transgenic mice 58(6): 359  
prolactin 58(4): 219  
proliferation 58(5): 343  
protein kinase C 58(3): 178  
protocatechuic acid (PCA) 58(6): 412
- rat 58(1): 72  
receptor 58(3): 165  
red fluorescence protein 58(1): 27  
rehabilitation 58(4): 237  
renal fibrosis 58(6): 367  
RSC96 Schwann cells 58(6): 412
- safrole 58(5): 302  
salivary immune factors 58(4): 263  
second-hand smoke (SHS) 58(3): 188  
sertraline 58(2): 85  
sex 58(2): 114  
signaling 58(3): 197  
silymarin 58(1): 38  
single pathway 58(3): 165  
sIPSCs 58(1): 46  
SIRC 58(2): 85  
skeletal muscle 58(5): 294

sodium pentobarbital 58(5): 332  
sodium-hydrogen exchanger-1 58(4): 254  
spasticity 58(4): 237  
spectral powers 58(5): 312  
stress 58(6): 404  
stressful cooling 58(5): 312  
Survivin 58(2): 95  
sympathetic 58(3): 165  
sympathetic influences 58(5): 312  
synaptophysin 58(2): 104  
  
Taiwan 58(1): 64  
testosterone 58(4): 263  
tonic modulation 58(1): 72  
TRADD 58(3): 156

traditional Chinese medicine 58(6): 393  
transforming growth factor- $\beta$ 1 58(6): 367  
transgenic mice 58(1): 27  
tumor marker 58(6): 385  
  
unilateral ureteral obstruction 58(6): 367  
  
vibration 58(4): 211  
  
whole body vibration exercise 58(4): 211  
  
XRCC3 58(1): 64  
ZR-75-1 58(6): 377
